

TECHNOLOGIES / SKILLS

- **Programming Languages:** JavaScript (ES6+), TypeScript, HTML, CSS
- **Major Frameworks:** React.js, Next.js, Astro
- **Tools:** Git, Jira, Bitbucket, Command Line, Visual Studio Code, Figma, Vitest/Jest, Cypress, Playwright, Axios, React Query, React Router Dom, Valibot, Zod

PROFESSIONAL EXPERIENCE

Front End Developer at VenueNow

June 2023 - Present

- Demonstrated ability to solve complex problems, effectively transforming challenges into efficient and practical solutions.
- Significantly reduced bugs by implementing unit and end-to-end tests. Leveraged TypeScript for type safety and integrated Zod/Valibot for data contract compliance.
- Led the adoption of TypeScript and ESLint, resulting in substantial increase in coding efficiency and the maintenance of high coding standards across the team.
- Improved the look and feel of our web applications using modern CSS and frameworks like Ant Design, shadcn/ui and Mantine UI.
- Designed and deployed a secure login system that reduced unauthorized access incidents, using JSON Web Tokens and refresh tokens using http only cookies.
- Demonstrated proficiency in integrating RESTful services, enhancing application functionality and communication with backend systems.
- Adhered to React best practices and design patterns, writing maintainable and efficient code. My focus on clarity and optimisation has led to improved codebase quality and team productivity.

Freelance Web Developer

January 2022 - Present

- Successfully designed and deployed custom websites for number of clients, focusing on fast, SEO-rich content delivery using Astro.
- Build full-stack apps with React (Next.js), Tailwind and Firebase / Firestore
- (WCAG) and ability to apply W3C web standards.
- Experience with Developer Tools across all major browsers.
- Good understanding of UX/UI principles.

COURSES

- Completed intensive courses at Front End Masters, which have directly enhanced my development skills and contributed to the team.
